

Her-2/neu (ZR218)

Rabbit Monoclonal Antibody

Specificity: Humans

Immunogen: Recombinant protein encoding the extracellular domain of human c-erbB

Ig Class: IgG

Storage: Store at 2-8°C for up to 2 years for concentrate form and 18 months for predilute form.

Staining procedures: Use formalin-fixed and paraffin-embedded sections. Retrieval conditions:

Pretreatment of deparaffinized tissue with heat-induced epitope retrieval is recommended. Detection

methods: Polymer anti-mouse/rabbit Ig detection system. Working dilution: 1:100-300. Positive Control:

Breast Carcinoma. Localization: Cell surface. Intended Use: Research Use Only (RUO).

Description: Recognizes a protein of 185kDa, which is identified as c-erbB-2/HER-2/neu. Its epitope is localized in the extracellular domain. C-erbB-2/HER-2 is a member of the EGFR family. This MAb is specific and shows minimal cross-reaction with other members of the EGFR family. Receptors of this family are located on the plasma membrane and consist of an extracellular ligand-binding domain connected to a large intracellular domain by a single transmembrane sequence. The c-erbB-2/HER-2 protein is over-expressed in various carcinomas, especially in the breast and ovary.

Intended Use: This antibody is intended for research use only (RUO). Her-2/neu(ZR218) monospecific Rabbit Monoclonal primary antibody is intended for laboratory use in the detection of Her-2/neu in formalin-fixed, paraffin-embedded tissue by immunohistochemical (IHC) staining. The staining results should be interpreted by qualified pathologists in conjunction with the patient's relevant clinical history.

Supplied As: Purified antibody in Tris-HCl buffer containing stabilizing protein and <0.1% ProClin.
