

Zeta MAX Antibody Diluent

- Description:** Provided as a ready-to-use (Tris Buffered) diluent for diluting primary antibodies and for use as a negative control. Both monoclonal and polyclonal antibodies are stabilized for long-term storage, thereby reducing the number of titrations required in concentrated form. This product contains a highly purified carrier protein that minimizes proteolytic enzyme degradation, a wetting agent to reduce surface tension, and an anti-microbial agent to prevent microbial growth. Not for antibodies that have been conjugated with peroxidase. In most cases, antibodies diluted in this reagent can be stored for 24 months at 2-8°C. The diluent is subjected to 0.2-micron filtration. pH: 6.2 ± 0.20 @ RT (18-25°C)
- Contents:** Tris Buffered diluent with highly purified carrier proteins. Exact nature of carrier proteins is proprietary. ProClin 950 at <0.1% by volume.
- Uses/Limitations:** Store at 2-8°C. Not to be taken internally. For research use only (RUO). For professional use. Histological applications. Do not use it if reagents become cloudy. Do not use past expiration date. Use caution when handling reagents. Non-Sterile.
- Precautions:** Avoid contact with skin and eyes.
Harmful if swallowed.
Follow all Federal, State, and local regulations regarding disposal.
